

Suicide Prevention Awareness Month

Suicide is a leading cause of death in the US. Suicide rates have increased more than 30% in half of states since 1999.¹ As suicide reaches crisis-level proportions in our nation, Magellan recognizes suicide as a public health crisis. We believe that one suicide is too many. During Suicide Prevention Awareness Month in September and throughout the year, suicide prevention is a primary focus of Magellan in managing behavioral health for our members and providing education in our communities. We are committed to increasing awareness of suicide prevention and offering free resources about the warning signs and skills needed to save a life. We encourage you to use these resources and share.

If you or someone you know is having thoughts of suicide, call 911 or contact a suicide hotline:

- National Suicide Prevention Lifeline (1-800-273-8255)
- Crisis Text Line (text HOME to 741741)

Suicide Prevention Awareness Month events
