

MAGELLAN HEALTHCARE

# Collaborative Care Management

*True physical & behavioral healthcare  
integration for whole-person care*

**Magellan**  
HEALTHCARE®

# Improve BH access and availability

Sixty percent of first-time behavioral health ER visits are from patients who saw their PCP recently but had no BH diagnosis.

Magellan Healthcare Collaborative Care, powered by NeuroFlow, offers an evidence-based, seamless way for PCPs to screen and treat BH conditions before they escalate.

## How it works

- ✓ **Validated measurement tools** proactively ID BH conditions.
- ✓ **Magellan licensed care managers** offer direct support to members and PCPs.
- ✓ **Magellan psychiatric consultants** make diagnostic and treatment recommendations.
- ✓ **Patient registry** facilitates member enrollment and real-time team collaboration.
- ✓ **Member app** offers self-care tools and personalized, evidence-based activities.
