

# New opportunity: Apply to become a High Fidelity Wraparound Agency in Nevada

Magellan Healthcare is now accepting applications from qualified entities to serve as High Fidelity Wraparound Agencies (WAAs) in Nevada. At least two agencies will be selected to coordinate and manage care for children and youth with serious emotional disturbances and their families and caregivers.

Selected WAAs will be expected to demonstrate:

- A family-driven, youth-guided approach to care
- A community-based and culturally competent service delivery model
- Fidelity to wraparound principles and practices
- A solid foundation of administrative accountability and ongoing internal quality improvement
- Active collaboration with behavioral health providers and other child-serving systems

Magellan Healthcare will provide ongoing oversight, training and payment to support the selected agencies.

## Building the system together

Nevada's High Fidelity Wraparound system is developing. This early-stage environment presents both challenges and opportunities, including the need for infrastructure development, workforce training and program growth. Magellan of Nevada is committed to working alongside WAAs to invest in these areas and build a stronger system that meets the evolving needs of Nevada's families.

## Submit your application

Interested agencies should review the full Request for Applications (RFA) and apply by July 25, 2025.
